

GLS ShipIT version 5.1

What's New on webservice?

Disclaimer

This documentation captures all changes from **versions 5.x**

The decision to which backend this version is deployed on, is taken by GLS countries.

ShipIT Farm and Preview01 will always be on the **latest version** developed.

To see the currently applied version, enter the webbackend **URL to a browser** followed by `"/backend/backendinfo/name"` and the response will inform you about the version:

<https://shipit-wbm-preview01.gls-group.eu:8443/backend/backendinfo/name>

```
"backendName": "shipit-wbm-preview01",  
"backendVersion": "5.1.4"
```

Labels

- 5.1 • Parcels **to Great Britain** will have the new label structure

- 5.1 • Parcels **to Switzerland and Liechtenstein** will have the new label structure
 - Please be aware that consignee (with product) and NDI (with shipper) area are switched here
